Hi there,

I met with the COCT fire department. They arrived there early and we began the inspection. I took them to the roof where they had a brief look around. We next went down the Marias road fire escape. They had a look at windows and emergency exits.

Richard Michaelmore and Steven Barick eventually turned up and both were abrupt and condescending to myself and the fire department officials. Barick wanted to show them the crawl space in his apartment and I was forbidden from entering said residence.

I waited about 40 minutes in the foyer before the COCT officials returned. They pointed out 2 issues:

- * The barrel latches on the Marias rd fire escape. They have to be removed *NOW*
- * There is a potted plant with only soil on the 5th floor

I've removed the barrel latches <https://trello.com/c/H0ZuflUo> and sent the pdf of the issue to COCT fire department and I will empty the soil and take the pot to the braai area tomorrow or Wednesday.

Michaelmore also stated that they are proceeding with CSOS and a high court application.
